## Exo V1

### Technical Data Sheet

|                        |                                                                                     |
|------------------------|-------------------------------------------------------------------------------------|
| Model                  | Sensorised Exo V1                                                                   |
| Net Weight             | 3.2 kg                                                                              |
| Peak Output            | 20 Nm                                                                               |
| Assistance Modes       | Rest / Comfort / Sport / Fitness                                                    |
| Terrain Adaptation     | Terrain / gait recognition: flat ground, stairs, walking, jogging, running, cycling |
| Smart Control          | Android App                                                                         |
| Battery Runtime        | Full-load runtime: $\geq 3$ hours<br>Light-load runtime (40% power): $\geq 6$ hours |
| Battery Rated Capacity | 4600 mAh                                                                            |
| Charging Time          | Type-C charging: 2.5 hours; Fast-charging dock: 1.5 hours                           |
| Battery Net Weight     | 556 g                                                                               |
| Operating Temperature  | -20°C to 60°C                                                                       |
| Charging Temperature   | 0°C to 40°C                                                                         |
